

A black silhouette of a city skyline is positioned at the bottom of the frame against a solid blue background. The skyline includes various building shapes, some with pointed roofs. The title 'City Escape' is written in a large, white, rounded font across the middle of the image, partially overlapping the skyline.

I want to order a **fish soup**...
a **dish with both vegetables
and meat**... but I am **allergic
to chicken**...The menu looks
so complicated...

[illegible]

An isometric 3D rendering of a restaurant layout. The main dining area is a large square room with a wooden floor, containing several red checkered oval tables with black chairs. A kitchen area with a brick wall and stainless steel equipment is located in the top right. The restaurant is surrounded by a green lawn with a white picket fence, a parking lot with a red car, a teal car, and an orange truck, and a red-roofed walkway. The text "Get some hints!" is centered in the middle of the dining area.

Get some hints!

Hey! You look so confused. Let me tell you something about Chinese characters. Hope it will help!

An aerial view of a restaurant with a courtyard. The restaurant has a brick exterior and large windows. The courtyard is paved with wooden decking and has several red checkered tables with chairs. There are some people sitting at the tables. The restaurant is surrounded by greenery and a white picket fence. A speech bubble is in the center of the image, containing text about Chinese and English languages. Two cartoon characters are in the foreground: a boy on the left and a girl on the right.

Chinese is a morphological language, but English is a phonetic language. We use 26 English letters to form English words with different meanings, but Chinese characters have multiple specific writing structures. Some parts of the characters have special meanings. Maybe you can observe some parts of the Chinese characters and guess the meaning of the word!

I have heard people say that in Chinese characters, this part “氵” represents the meaning of “water”. Like in the character “河”, it has this part, so it means “river”. Most of the characters that include this part refer to liquids.

You may have already noticed how to write vegetables in Chinese, do you know why? This part “艹” in Chinese characters means “grass”, so many words that represent vegetables include this part !

Also! If you want to find the words represent chicken or duck, remember to find this part “**鸟**”, which means birds in Chinese.
